

Barriers

in Swansea which are sub-standard

The table below lists the barriers on ATNM routes through which tricycles, wheelchairs, bikes with trailers or tandems either cannot pass or can only do so with difficulty. If on the four maps on www.wheelrights.org.uk/routes.htm they are identified by the characters used to identify routes followed by a number, eg SA-1, which relates them to the photos. The barriers will be removed from the table when they are sorted. (Last update: 4 July 2024.)

The barriers are listed clockwise round Swansea: SW, NW, NE, SE.

Id	Location	Grid Ref.	The problem.
